

high res studio

fine garden design

high res studio is a specialized design studio within **SeamonWhiteside+ASSOCIATES** that focuses on fine garden design; offering creative vision, exceptional design and impeccable service for homes, estates, amenity centers, botanical gardens, and parks. Our design team creates beautiful, meaningful, and functional spaces that reflect the unique personalities and lifestyles of our clients.

services

site and garden design

- Develop detailed landscape plans that integrate all elements of the project including walks, driveways, walls, patios, decks, yards, gardens, arbors, pools, ponds, and play spaces.
- Make recommendations for managing natural areas and caring for existing vegetation.
- Provide plans and opinions of probable cost for construction, drainage solutions, grading, and new plantings.
- Cutting edge sustainable garden solutions including raingardens, xeriscaping, cisterns, and edible landscape gardens.

site planning for new homes

- Determine the best placement of the house, driveways, walks, walls, and all outdoor living spaces.
- Provide plans that celebrate and protect valuable natural features.
- Collaborate with architects and builders on home design to ensure that the structure relates to the land.

construction phase services

- Oversee and guide the work of landscape contractors, masons, and all others involved in building the landscape and hardscape elements.
- Provide a future maintenance and care plan for the finished product.
