

OLDE PARK

Mount Pleasant, SC

SeamonWhiteside + Associates was commissioned to provide master planning, civil engineering, landscape design, and permitting assistance for the 114-lot infill community. Located adjacent to award-winning l'On, Olde Park was designed to provide residents with a traditional neighborhood lifestyle. The landscape design incorporated a large number of the existing pine and oak trees and enhanced the existing tree cover with mature Palmettos and dogwoods.

SW+A's design of the brick and stone bridge, entrance signage, and the addition of the lake-front gazebo deepens the feeling that the development was established decades earlier.
