

HANAHAN CITY PARK

Hanahan, South Carolina

Working with the City of Hanahan's Parks and Recreation Department, SeamonWhiteside + Associates prepared a master plan for the 12½-acre, \$1.5M City Park. Following acceptance of the plan, SW+A provided landscape architecture, civil engineering, permit coordination, and will provide construction administration for the project.

The park includes an approximately 1,500 SF complex building with bathrooms, storage, and concessions, plus picnic pavilions and viewing gazebos overlooking the Goose Creek reservoir. Throughout the design development and continuing through the construction phases, particular attention was paid to budgetary constraints; keeping the project budget aligned with grant money, and phasing the project according to client priorities and funds availability.
