

MIKASA CORPORATION

Berkeley County, South Carolina

SeamonWhiteside + Associates provided complete master planning, civil engineering, landscape architecture, permit coordination, and developed cost estimates for the design/build of Mikasa Corporation's 60,000-sq. ft. regional headquarters, retail outlet store, and a 600,000-sq. ft., state-of-the-art, automated warehouse.

Civil engineering services provided to the project included extensive water and sewer design comprised of a 30 inch water main extension and wastewater and stormwater facilities. SW+A worked in close coordination with Charleston Commissioners of Public Works to cost-share utility improvements for the area concurrent with the Mikasa warehouse and headquarter facilities' construction.

SW+A's landscape architecture division developed comprehensive planting and irrigation plans for the project and provided construction administration services.
